

GARDEN STATE LUMBER PRODUCTS
INTRODUCES

Garden State Lumber Products would like to introduce PLATINUM PROTECTED, the newest member of our ever-expanding offering of S4S trimboards. Providing unparalleled protection against rot, fungus, mold, mildew, and even termites, PLATINUM PROTECTED stands apart from other trim products for its multi-phase protection process that covers all four sides of the substrate and ensures the ultimate in defense against the natural environment. Merging the industry's highest quality Radiata substrate by CMPC Maderas with the expertise of the FrameGuard® Total treatment system and Garden State Lumber's proprietary Two-Coat priming system, PLATINUM PROTECTED is the new standard for environmentally friendly treated S4S Trimboards.

FrameGuard® Total™ Wood is protected with anti-mold fungicides and preservative compounds. The fungicides remain close to the surface to provide protection against mold. Moldicides inhibit mold's ability to break down the wood and consume the sugars and starches mold needs for growth; thus, wood becomes unattractive as a food source. Meanwhile the borate component penetrates into wood providing protection against both decay and insects, and Imidacloprid insecticide enables wood to resist damage from Formosan termites.
